

Selenginsky Pulp and Cardboard Mill, OJSC

Operating since 1973

About us

Selenginsk Pulp and Cardboard Mill, OJSC, is located in the Kabansky District of the Republic of Buryatia, Russia. It is one of the leading producers of pulp, paper, and packaging materials. Founded in 1973, the mill supplies packing and wrapping materials to the food, chemical, construction, and medical industries both domestically and internationally. Located near Lake Baikal, the plant has employed modern wastewater treatment systems and strictly adheres to environmental standards since 1974. Since 2013, the company has had a new owner. Since then, extensive modernization has been completed: kraft fluting production was launched in 2019, the wire table was upgraded in 2023, new dyeing stations were installed in 2024, the wood chipper in the fiber preparation was modernized, and more. The mill employs highly qualified personnel and has its own extensive repair facility.

The pulp and paper mill has won numerous awards, including "Exporter of the Year" (2020), "100 Best Products of Russia," and others. The company remains a key player in the forestry and paper industry and is actively developing export sales.

Key Features of Cellulose Cardboard

- ▶ **Environmentally friendly production, meets international standards**
- ▶ **Durable, damage-resistant material**
- ▶ **Used for the production of corrugated cardboard, as well as shipping and consumer packaging**
- ▶ **Ideal for food contact**
- ▶ **Smooth surface, ensures high-quality printing**
- ▶ **Cardboard is easily recycled and reused**

We produce cardboard for flat corrugated cardboard layers from 100% softwood and hardwood pulp.

**The cardboard is made from kraft pulp.
Grades KS, K**

Cardboard quality complies with TAPPI T545 OM-2011.

**KDM width: 4200 mm.
Cardboard is produced in rolls of various formats.**

1050 mm

1260 mm

1400 mm

1600 mm

2100 mm

Custom formats are available.

Main export items:

- ****Unbleached sulphate pulp****

HS code: 4703 21 000 0

Annual capacity: 110,000 tons

Min. shipment lot: 25 tons (one full container)

Max. contract volume: up to 10,000 tons/year

- ****Cardboard for flat layers of corrugated cardboard (containerboard grades K-0 and K-2)****

HS code: 4804 11 900 0

Annual capacity: 100,000 tons

Min. shipment lot: 20 tons

Max. Contract volume: up to 8,000 tons/year

- ****Kraft fluting (corrugating paper)****

HS code: 4804 19 000 0

Annual capacity: 50,000 tons (new technology since 2019)

Min. volume: 20 tons

Max. contract volume: up to 5,000 tons/year

Marketing Geography

Logistics in the Russian Federation

The plant has its own railway station, adjacent to the East Siberian Railway, allowing shipments of products by rail and/or container in any direction. Highway access is via federal highway R-258 «Baikal».

Existing export routes:

- Seaports: Vostochny Port (Nakhodka) and Vladivostok Commercial Seaport are the main gateways to Asia-Pacific countries.
- Land crossings: Kyakhta checkpoint (Buryatia - Mongolia), then to China; routes via Blagoveshchensk and Zabaikalsk are also possible.

Distance from Selenginsk to the nearest Russian border (Kyakhta checkpoint): approximately 350 km by road and rail (4-6 hours).

Customs clearance is carried out directly on the plant's premises. Multimodal options are available: rail → sea or rail → road.
